

# Project Clock

## Time Tracking for Consultants

As a consultant, you must keep track of time and details on several different projects. This can be a time consuming process. Important information can be strewn about or even missing. Project expenses and estimated time can be inaccurate, and as a result, you might end up over charging or under charging your clients.

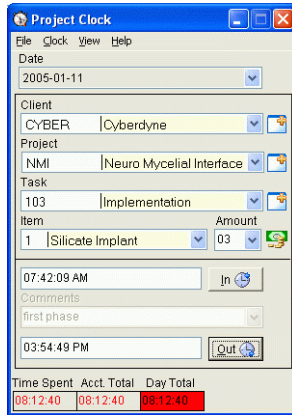

To solve the above problems, CyberMatrix is proud to present **Project Clock**, a software package specifically developed for consultants. **Project Clock** is designed to maximize your productivity and by using it, you can eliminate cumbersome paper-based alternatives.

All users find it helps their days run smoothly by conveniently keeping track of details and time billed to different projects and clients. **Project Clock** is simple to use, easy to install, and very cost effective.

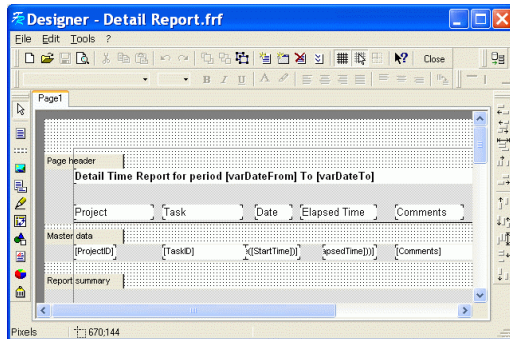

## Benefits of Project Clock

- Keep accurate billing records by easily punching time in and out for each project.
- Optionally break down your time further by Task and Client
- Bill your time to clients with the simple invoicing features.
- Keep track of project costs and schedules with the project management and expense features.
- Save time by exporting your time data to QuickBooks without re-keying.
- Create you own reports. (Pro, Client/Server and Web editions)
- Use for all your employees sharing time over the network. (Pro edition)
- Share your project time data over the Internet (Client/Server, Web editions)

## About CyberMatrix Corporation

CyberMatrix is a software company based in Vernon BC. Starting in May 1993 as CyberMatrix Computing, we focused mainly on computer consulting and some of our own commercial software development. In February 1998, the company was incorporated and began operating under the name CyberMatrix Corporation, Inc.

At CyberMatrix, we are committed to meeting the needs of businesses with quality software and dedicated customer support. We know that in order to succeed, the customer must always come first and foremost. We are always open to suggested improvements to our software and strongly encourage feedback.

Currently, our company's main focus is developing and selling quality business software. However, we can also perform customizations of our existing software for those customers with special needs. We can even develop specialized applications for interested companies.

We count among our customers fortune 500 companies, various government agencies and several respected Universities. We invite you to become one of our many satisfied customers too. For more information and a list of our products, visit our website at
