

About CyberMatrix Corporation

CyberMatrix is a software company based in Vernon BC. Starting in May 1993 as CyberMatrix Computing, we focused mainly on computer consulting and some of our own commercial software development. In February 1998, the company was incorporated and began operating under the name CyberMatrix Corporation, Inc.

At CyberMatrix, we are committed to meeting the needs of businesses with quality software and dedicated customer support. We know that in order to succeed, the customer must always come first and foremost. We are always open to suggested improvements to our software and strongly encourage feedback.

Currently, our company's main focus is developing and selling quality time management software. Our time management software consists of scheduling software, timesheet entry software and time recording/time tracking software. We can also perform customizations of our existing software for those customers with special needs. We can even develop specialized applications for interested companies.

We count among our customers fortune 500 companies, various government agencies and several respected Universities. We invite you to become one of our many satisfied customers too. For more information and a list of our products, visit our web site at

As a service company, you must keep track of the time and details of different projects for all of your employees. Traditional paper-based timesheet entry involves wasteful data re-entry. As a result, your managers and employees are not as productive as they could be.

CyberMatrix **Timesheets** is the easy to use cost effective solution. **Timesheets** is designed to maximize your productivity and by using it, you can eliminate cumbersome paper-based alternatives.

Reduce labor costs and increase accuracy by having your employees enter their own time and expense information using one data store on your network.

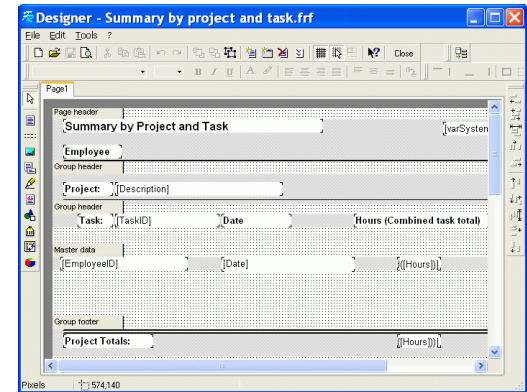

Benefits/Features of Timesheets

- Save time over old-fashioned paper-based timesheet entry.
- Maintain a record of employee time spent on different projects.
- Use for all your employees sharing timesheet data over the network.
- Share your timesheet data over the Internet (Client/Server, Enterprise, Web editions).
- Use with your choice of back-end database server (Enterprise version).
- Save time by exporting your time data to QuickBooks without re-keying.
- Assign rates by employee, client or project for time billing purposes.
- Choose from the many existing reports or create you own time entry reports with the custom reporting feature.

Timesheets Main Screen

Timesheets Custom Reporting Screen
